### **Going Green**

Hilton Sandestin Beach is committed to doing their part to protect the environment and conserve natural resources. Implementing practices such as recycling, water conservation, and energy reduction have been a long-standing staple to the resort's efforts. Additional upgrades including LED lighting, A/C enhancements, and more have been made in more recent years to increase eco-friendliness and decrease Hilton Sandestin Beach's carbon footprint.

Hilton Sandestin Beach's deck areas include amber lighting designed to minimize disturbances to nesting sea turtles, their hatchlings, and other coastal wildlife. The deck areas include an eco-friendly composite made by Moisture Shield that is cooler on bare feet. In addition to lighting and conservation on-site, the resort has planted more than 30,000 sea oats to protect the shoreline dunes.

In partnership with local affiliate South Walton Turtle Watch, the resort helps to promote turtle awareness through videos on in-room channels and messaging on to-go bags from Barefoots, the resort's outdoor restaurant. Special programming has been implemented around Earth Day where a representative from the organization conducts "turtle talks" for younger guests to learn about the importance of protecting sea animals and the surrounding environment.
